

Grow a Moustache for 'Movember' in aid of testicular cancer awareness

November 1st sees the start of 'Movember', an entire month dedicated to producing the best facial fuzz you can manage. 'Movember' is all about raising awareness of testicular cancer, a disease most common among males aged 15-40.

Why not challenge your friends, family or colleagues to a competition for the biggest, bushiest, longest or even scariest moustache you can grow? You could even do it for charity. Popular choices include the Handlebar, the toothbrush (like Charlie Chaplin) or even the big and bushy Walrus moustache.

Look out for those dodgy 'taches on your teachers, friends and relatives. If nothing else, it will keep your top lip warm as Winter sets in....
